SOLUTIONS**

Delta1st is the WAS POS with direct rails to the card brands designed to be more than a POS terminal but a system to operate your business more effectively.

Most POS systems sell payments first. Delta1st was built to run the entire business.

Quick-service restaurants move customers through faster during peak periods. Mobile and countertop devices allow staff to take orders and payments anywhere, reducing lines and increasing throughput.

Service providers can manage scheduling, invoicing, pay-by-link, recurring billing, and payments into one system. Reducing administrative work, collecting invoices quicker, and providing a consistent customer experience.

Retail locations can manage inventory, scan barcodes, track payments with real-time reporting in one platform. Reducing stockout or overstock situations while simplifying operations and improving control.

Delta1st Package Preview
