FAST, FLEXIBLE POS DESIGNED FOR SPEED OF SERVICE—NOT FULL-SERVICE COMPLEXITY.

“When your line backs up, can you take orders and payments anywhere—or only at the counter?”

Enables staff to take orders and payments anywhere using mobile and countertop devices. With fast menus and modifiers This reduces checkout bottlenecks and shortens lines peak hours.

Centralizing transactions, payments, tips, taxes, and reporting into a single platform with built-in reconciliation. Operators close out days faster with fewer errors and no manual spreadsheets.

Purpose-built, eliminating table management, reservations, and server workflows designed for full-service restaurants. Only pay for what you need, simpler operations and lower software costs.

Most POS systems sell payments first. **Delta1st** was built to keep QSR lines moving, margins protected, and operations simple.

Other POS Systems

Built for full-service dining, including table management, coursing, and server workflows QSRs don't need

Fixed register workflows can slow service during peak hours

Add-on pricing for mobile ordering, advanced reporting, or modifiers

Multiple systems or apps required for payments, reporting, and reconciliation

Complexity increases training time for high-turnover staff

Delta1st

Purpose-built for quick service with no table management or reservation overhead

Mobile and countertop devices allows staff to take orders and payments anywhere

Fast menus, modifiers, and tip-at-sale designed for rapid checkout

Transactions, payments, and reporting unified in one system

Lower cost and simpler operation for order-at-counter environments
