

**WOODFOREST
ACCEPTANCE
SOLUTIONS**

Delta1st was built for retailers who need speed,
control and visibility.
WITHOUT ENTERPRISE COMPLEXITY.

ARE YOU MANAGING INVENTORY, PAYMENTS, AND REPORTING ACROSS MULTIPLE SYSTEMS TODAY?

Providing real-time inventory tracking with barcode scanning, low-stock alerts, and purchase order management. Retailers maintain optimal stock levels, to reduce overstock or stock out situations.

Consolidated reports of sales, payments, taxes, discounts, and returns to reconcile transactions. Retail owners close days faster, reduce errors, and eliminate manual spreadsheets

Streamlined POS workflows, custom menus, barcode scanning, split payments, and mobile or multi-register support speed up checkout. Reducing lines, improving customer experience, and increasing sales during busy periods.

Most POS systems sell payments first. **Delta1st was built to run the entire retail store** while controlling inventory, margins, and operations.

Other POS Systems

Inventory and payments often require separate modules or third-party apps

Limited visibility leads to over-ordering or empty shelves

Slower checkout experiences during peak traffic due to rigid workflows

Manual reconciliation across sales, discounts, taxes, and returns

Costs increase as merchants add inventory, reporting, or multi-registers.

Delta1st

POS, inventory tracking, barcode scanning, purchase orders, and payments unified

Real-time inventory visibility reduces stockouts and excess inventory

Streamlined checkout with barcode scanning, mobile POS, and split payments

Built-in reporting and reconciliation eliminates manual spreadsheets

Scales with the business without enterprise-level cost or complexity
