SOLUTIONS

ONE PLATFORM TO SCHEDULE JOBS, INVOICE CLIENTS, AND GET PAID – ANYWHERE WORK TAKES YOU.

Are you using one system to schedule, another to invoice, and another to take payments?

Scheduling, invoicing, pay-by-link, and payment acceptance into a single, unified platform. Eliminating disconnected tools, reducing manual handoffs, and managing the entire job-to-payment lifecycle in multiple systems.

Centralize transactions, invoices, recurring payments, tips, and reporting in one system with built in reconciliation. Producing cleaner records, fewer errors, and no spreadsheets.

Faster payment through invoicing, pay-by-link, and recurring billing all tied directly to the POS. You get paid sooner, improve cash flow, and reduce time spent chasing outstanding payments.

Most POS systems sell payments first. **Delta1st was built to run end-to-end services jobs** while getting paid faster with few tools.

Other POS Systems

Scheduling, invoicing, and payments often live in separate tools or paid add-ons

Limited support for remote, on-site, or mixed payment environments

Manual reconciliation across invoices, terminals, and reports

Delayed payments due to disconnected billing and follow-up processes

Tools optimized for retail checkout, not service workflows

Delta1st

Scheduling, invoicing, pay-by-link, recurring billing, and payments in one platform

Supports in-store, on-site, and remote payments using the same system

Centralized reporting and built-in reconciliation reduces back-office work

Faster payment collection improves cash flow

Designed around the full service lifecycle, not just checkout
