SaleQuick Mobile

Use Cases

Intro / First Touch (Mobile, Field, Event Merchants)

Subject: Take Payments Anywhere

Hi {{First Name}},

I wanted to introduce SaleQuick Mobile, a mobile-first payment solution that allows merchants to securely accept payments anywhere using their phone or tablet, without the cost or complexity of a full POS system.

SaleQuick Mobile is ideal for businesses that need flexibility and want to:

- Take payments onsite, in the field, or at events
- Accept tap, chip, and swipe payments from a mobile device
- Send invoices, text-to-pay, or pay-by-link requests (Pro)
- Get paid faster without changing how they operate

Best,
{{Name}}

Discovery Follow-Up (After Initial Call)

Subject: Next Steps

Hi {{First Name}},

Thanks for walking through your current setup.

Based on what you shared, SaleQuick Mobile could be a strong fit because it:

- (notes from the call)

It's designed to keep things simple, letting you take payments wherever your business happens, while adding tools like invoicing or pay-by-link only if and when you need them.

If helpful, the next step would be a quick demo of how this works in real-world scenarios.

Best,

Service & Field-Based Businesses Outreach

Subject: Get Paid On Site

Hi {{First Name}},

Many service businesses complete jobs onsite but still have to invoice later or chase payments afterward.

SaleQuick Mobile lets your team accept payments immediately, right at the job site, using a phone or tablet with a secure card reader.

This helps businesses:

- Get paid faster (no follow-up needed)
- Reduce unpaid invoices
- Improve cash flow
- Keep workflows simple

If getting paid on the spot is a priority, this could be a great fit.

Best regards,

Mobile & Event-Based Sellers Outreach

Subject: Sell Anywhere

Hi {{First Name}},

For pop-ups, markets, and event-based selling, traditional POS systems can feel expensive and impractical.

SaleQuick Mobile turns your phone or tablet into a portable checkout solution, so you can accept payments anywhere with minimal setup.

It's a strong fit for businesses that:

- Sell at events, pop-ups, or multiple locations
- Need fast, reliable checkout on the go
- Don't want to invest in heavy POS systems

Happy to show how this works in practice.

Remote Payments / Invoicing Use Case

Subject: Get Paid Virtually

Hi {{First Name}},

When customers aren't physically in front of you, getting paid can slow things down.

With SaleQuick Mobile Pro, you can:

- Send invoices or payment links
- Accept payments via text or email
- Set up recurring billing
- Take payments through a virtual terminal

All without moving to a full POS or eCommerce platform.

If remote payments are part of your process, this makes it much easier.

Best,

Post-Demo Follow-Up

Subject: Next Steps

Hi {{First Name}},

Thanks again for your time today.

Quick recap:

- (notes from the call)

Recommended next steps:

- (what was aligned on the call)

Let me know how you'd like to proceed.

Best,

{{Name}}

Objection Handling – “We already have a POS”

Subject: Parrell Setup

Hi {{First Name}},

That's actually very common.

SaleQuick Mobile isn't meant to replace your POS, it fills the gaps where traditional systems don't work well, like taking payments in the field, at events, or remotely.

It's a simple way to extend your payment capabilities without changing how you run your business.

Happy to talk through where it fits best.

Best,

{{Name}}

Partner Enablement / Deployment Setup

Subject: SaleQuick Mobile Enablement

Hi {{First Name}},

To ensure a smooth rollout, we recommend a focused enablement session covering:

- Mobile setup (iOS/Android + card readers)
- Standard vs Pro package capabilities
- Transaction types (card-present, invoicing, pay-by-link, recurring)
- Reporting and reconciliation expectations
- Positioning SaleQuick vs full POS solutions

This helps ensure SaleQuick is positioned correctly as a mobile-first payments solution within the WAS portfolio.

Let me know your availability and we'll get it scheduled.

Best regards,
