SOLUTIONS

WAS delivers a single acquiring relationship designed for ISOs who want control, not dependence, on arbitrary underwriting, risk, compliance, processing, settlement, funding, reporting, and support rails. This unified model gives ISOs a stable foundation to scale without fragmented processors, gateways, or PayFacs. For added flexibility, WAS also offers a Shadow Program that provides greater autonomy while maintaining issuer-connected acquiring.

Designed for ISOs who want control of their portfolio

Break free from rate wars and equipment giveaways by enabling a portfolio built on ownership, and scalability, equipping agents with a value-driven story that attracts serious, long-term businesses.

Retain merchants by providing one accountable acquiring owner, delivering faster resolutions, clearer answers, and stronger loyalty.

Eliminates processor sprawl by delivering POS, gateway, virtual terminal, invoicing, and embedded payments on a single acquiring platform, simplifying the entire sales-to-support lifecycle.

Why ISO's Choose WAS

✓ **Portfolio Ownership — Not Reseller Dependency**

Build a more durable, sellable merchant portfolio with fewer external dependencies and greater long-term control.

✓ **Consistent Underwriting & Risk Governance**

Reduce surprises, protect portfolio health, and strengthen merchant relationships with consistent, issuer-aligned decisions.

✓ **One Acquiring Platform Across All Solutions**

Deploy faster, operate cleaner, and spend less time managing processor fragmentation across product lines.

✓ **Built-In Sales Enablement**

Improve agent productivity, increase merchant retention, and drive stronger referrals through value-based selling.
