

WOODFOREST ACCEPTANCE SOLUTIONS

WAS is an issuer-connected acquiring platform that owns and operates the entire payments lifecycle—so partners can scale payments without relying on legacy processor stacks or stitching together gateways, risk providers, and settlement layers.

WAS manages onboarding, underwriting, processing, settlement, funding, risk, reporting, and support under a single acquiring relationship—delivering payments across POS, gateways, virtual payments, invoicing, and embedded software with partners closer to the transaction and the data it generates.

ONE ACQUIRING PLATFORM, DIRECTLY CONNECTED TO THE ISSUER, DESIGNED TO GIVE PARTNERS FULL OWNERSHIP OF PAYMENTS.

WAS powers embedded payments for ISVs to monetize payments without operational risk while maintaining ownership of the product, customer experience, and merchant relationships.

WAS helps ISOs build durable portfolio value by replacing fragmented processors, enabling ownership of underwriting, funding visibility, and reporting—without dependency on legacy networks.

WAS gives merchants direct access to issuer-connected acquiring—delivering faster insight, more transactional data, and greater control over how payments power their business.

THE WAS FACTOR

- ✓ **FINTECH-BUILT, ISSUER-CONNECTED**
Directly connected to the issuer, removing dependency on legacy networks while unlocking greater control, transparency, and scalability for embedded payments and next-generation commerce.
- ✓ **FULL OWNERSHIP OF PAYMENTS**
Partners retain ownership of the payment experience, economics, and data—rather than renting access through third-party processors.
- ✓ **CLOSER TO THE TRANSACTION**
Merchants and partners gain richer data and faster insight by operating closer to authorization, settlement, and funding.
- ✓ **ALIGNED WITH THE CARD BRANDS**
WAS stays closer to card network roadmaps and new releases—enabling faster adoption of emerging capabilities.
