PAX SIERRA APP

CARD PAYMENTS-ONLY ACCEPTANCE ON PAX ANDROID TERMINALS

PAX Sierra App is a device-native payment and merchant application platform that enables seamless in-terminal app deployment, transaction processing, and value-added services directly on PAX hardware, supporting secure, scalable in-store payment experiences

WAS ECOSYSTEM FIT

PAX Android Terminal

WAS
PAX Terminal

Card-present payment endpoint
Payments-only acceptance layer
Centralized acquiring, processing, settlement, and compliance
Sierra App ➔ WAS (Acquiring & Compliance)

A payments-only solution that modernizes card-present acceptance while preserving existing systems, not a POS or operational platform.

WHO IT'S FOR

- ✓ Merchants that already run a POS, ERP, or manual workflow
- ✓ Businesses upgrading from legacy or aging card terminals
- ✓ Retail, service, healthcare, or light food environments needing payments without POS complexity

KEY CAPABILITIES

- ✓ EMV chip, contactless (tap-to-pay), and magstripe acceptance
- ✓ Standalone or semi-integrated payment operation on PAX hardware
- ✓ On-device transactions, refunds, receipts, and batch settlement via WAS

➔ PAX Sierra enables WAS and partners to modernize payments for legacy and payments-only merchants, expanding reach while preserving volume and creating a path to more advanced solutions as needs evolve
